Summary

Passionate Computer Science Student

Driven by curiosity and creativity, I specialize in web development with a strong foundation in HTML, CSS, and JavaScript. Currently, I'm expanding my skills in React through hands-on projects that enhance my front-end development expertise and attention to detail.

Beyond web development, I explore digital design and animation using tools like Blender, and I venture into Python for AI-driven automations. My entrepreneurial spirit is reflected in my web development agency, Sura, where I apply technical skills in project management and client relations.

I am adaptable and versatile, balancing front-end expertise with graphic design using Canva and a growing interest in back-end technologies. My goal is to deliver polished, comprehensive solutions to solve Real world problems and Drive Impact through Technology and Engineering

Education

Computer Science and Software Engineering, *Bells University Of Technology*   2025 – 2028

Skills

Frontend Development
HTML, CSS, JavaScript, React...

Creative Design — Competent
Figma, Canva, Blender3D, Illustrator.
